

STRUCTURAL TURNOUT GEAR

BRAVE ULTRA

Four-layer professional firefighter protective clothing, compliant with NFPA 1971:2018

The **BRAVE ULTRA** professional firefighter protective clothing by Helios Innovative has been developed for fire departments that require the best protection when fighting fires.

Made with the latest fire protection technology, the BRAVE ULTRA complies with NFPA 1971:2018.

It features four layers, highlighted by its two intermediate layers: a moisture barrier that prevents water from entering the suit, and a thermal barrier that keeps external heat from reaching the wearer.

The trousers feature H-style suspenders for greater comfort, and the entire suit is fitted with 3M™ Scotchlite™ reflective trim.

The BRAVE ULTRA also features leather reinforcements at the elbows and knees, as well as drainage holes in all pockets.

DESIGNED FOR

Professional fire departments

Structural firefighting

CONSTRUCTION

Four-layer protection

Layer	Composition
Outer shell	Nomex® IIIA 6.8 oz/yd² (93% Nomex®, 5% Kevlar®, 2% P140) · rip-stop weave
